

## Premium Hominy Meal (Feed Co-Product)

VS

## Feed Corn

*Higher Value – Competitively Priced*

SEMO Milling’s premium meal is a unique feed product that combines superior feed value with competitive pricing when compared to traditional feed corn.

Below is a comparison of our premium meal and corn:

Analysis	Corn	Premium Meal	Diff +/-	% +/-
Crude Protein %	7.10	9.30	2.20	30.99%
Crude Fat %	3.36	7.42	4.06	120.83%
Ash %	0.50	2.29	1.79	358.00%
Total Digestible Nutrients %	80.60	82.30	1.70	2.11%
Net Energy (lactation) Mcal/lbs	0.85	0.87	0.02	2.35%
Net Energy (maintenance) Mcal/lbs	0.90	0.92	0.02	2.22%
Net Energy (gain) Mcal/lbs	0.59	0.61	0.02	3.39%
Digestible Energy Mcal/lbs	1.61	1.64	0.03	1.86%
Metabolizable Energy Mcal/lbs	1.52	1.54	0.02	1.32%
Lysine (total) %	0.29	0.46	0.17	58.62%
Tryptophan (total) %	0.07	0.14	0.07	100.00%

**Crude Protein** - A consistent 25% - 30% advantage for premium meal!

**Crude Fat** - Premium meal consistently has more than DOUBLE the fat content!

**Essential Amino Acids** - Premium meal has notably higher levels of lysine & tryptophan!

**Ready to use** - No labor and energy costs like there are with grinding corn!

*SEMO Milling’s Premium Meal - Built-in Advantages at Competitive Prices!*
